Take Over Days
for Young People in Europe

TO:DAY is an Erasmus+ project for young people who want to get a taste of what it is like to lead important services and businesses and engage in their communities as active citizens. We are creating a toolkit to help setup Take Over Days where groups of young people takeover' a key aspect of, for example, a local authority service, a TV station, supermarket chain etc. The idea is based on the successful Takeover Challenge from the UK.

Main activities

Project start date: 4 June 2018

Project end date: 3 June 2020

1

The TO:DAY Toolkit codesigned with youth workers and young people to help them set-up and take part in Take Over Days.

2

Informal learning materials for active citizenship and supporting competences.

3

A Take Over Training Camp for 40 young people from partner countries to meet and discuss their ideas for the Toolkit and what it means to be an active citizen in Europe.

4

Work with public and private sector to host Take Over Days in each partner country.

First steps . . .

Take Over Days are becoming more widely used in the UK to engage young people in exploring leadership and the world of work. Our research shows that they are not widely known in other EU countries.

The first phase of the project is to:

- Find out from young people what skills and competences they need to take part in a Take Over Day.
- Ask local employer organisations what information and advice they might need to hold a Take Over Day.
- Seek advice from youth workers and other professionals working with young people.
- Explore related youth engagement activities in partner countries.

This project has been funded with support from the European Commission and this publication reflects the views only of the author, the Commission cannot be held responsible for any use which may be made of the information contained therein.
